

● THINK HOSTED | HOME OF FLEXIDesk BY THINTECH

I want to be free.

Hosted desktops, hosted applications and managed IT operations for UK businesses that want flexibility without giving up control.

Your business gets the freedom. Thintech takes the responsibility.

WHAT IS HOLDING THE BUSINESS BACK?

Freedom should show up as practical movement.

flexiDesk is designed for organisations that need people to work from different locations, use important applications, and stay supported without relying on ageing servers or unclear supplier boundaries.

1

Free from ageing servers

Reduce dependency on fragile office infrastructure and move towards a managed operating platform.

2

Free to work anywhere

Support office, home, mobile and multi-site users without lowering security or support standards.

3

Free from supplier confusion

Replace fragmented responsibility with one accountable Thintech team across users, devices, apps and suppliers.

4

Free to say yes

Add people, locations and ways of working without rebuilding the whole IT estate every time.

Your IT department, delivered as a service.

flexiDesk gives businesses the freedom to work their way while Thintech takes responsibility for keeping everything secure, supported and operational.

Your working model can change. Your security and support standards do not.

flexiDesk does not force every customer or user into the same operating model. Hosted, local, mobile and hybrid services can work together while Thintech keeps the operating standards consistent.

Complete hosted desktops

Hosted applications

Managed local Windows computers

Hybrid working models

Remote and multi-site working

24x7 service desk access

Freedom without compromise

Identity controls, endpoint protection, email security, backup, monitoring, supplier coordination and service management stay part of the operating model.

START WITH THE REVIEW

The IT Freedom Review

The review helps identify whether your current IT setup is restricting the business, where responsibility sits today, and whether flexiDesk is a sensible next step.

We look at responsibility

Who owns users, endpoints, identity, applications, backup, security and suppliers?

We look at working model

Who needs hosted desktops, hosted applications, local devices or a hybrid setup?

We look at risk

Where are the weak points in support, recovery, security and internal knowledge?

We look at fit

Whether flexiDesk is the right option, and what should be confirmed before proposal.

What would you do if IT stopped holding you back?

Tell us how you want to work. We will show you how flexiDesk can make it possible.

From GBP 75 per user per month

Subject to user requirements, applications, licensing and migration scope.
